Monitoring Armenian IT Industry

Specification Doc

Index

Used technologies and frameworks

- **Background services**
  - ➔ Windows NT service for github information scrapping
  - ➔ Windows NT service for linkedin information scrapping
  - ➔ Windows NT service for proxy scrapping

- **Desktop applications**
  - ➔ WPF application for manually github profile scrapping
  - ➔ WPF application for manually linkedin profile scrapping

- **Data access layer**
  - ➔ MSSQL database
  - ➔ Entity Framework Core 2.2 (last version)
  - ➔ Repository pattern

- **Business logic layer**
  - ➔ Common lib for all models used .NET Standart 2.0
  - ➔ Repository pattern

- **Web API**
  - ➔ ASP NET Core 2.2 (last version)

- **Technologies and libraries**
  - ➔ ASP NET Core 2.2 (last version)
  - ➔ EF Core 2.2 (last version)
  - ➔ .NET Standart 2.0
  - ➔ .NET Framework 4.7
  - ➔ Selenum web driver
  - ➔ nLog (last version)
  - ➔ WPF
  - ➔ HTMLAgilityPack
  - ➔ Remotion.LINQ

Web API

GitHubs

- **Get (returns all GitHub users info from database)**
  - ➔ Request - /api/github
  - ➔ Response
- **Get By Id (returns specific profile and repositories of that GitHub profile by id)**
  - ➔ Request - /api/github/{id}
  - ➔ Response
- **Get by username (returns specific profile and repositories of that GitHub profile by username)**
  - ➔ Request - api/github/user/{username}
  - ➔ Response

Linkedins

- **Get (returns all Linkedin profiles from database)**
  - ➔ Request - /api/linkedin
  - ➔ Response
- **Get By Id (returns specific Linkedin profile by id)**
  - ➔ Request – /api/linkedin/{id}
  - ➔ Response
- **Get By username (returns specific Linkedin profile by username)**
  - ➔ Request – /api/linkedin/user/{username}
  - ➔ Response

1 Customers

1.1 Get

Get all github profiles from database

Request

Method	URL
Get	/api/github

Response

Status	Response
